

Example Manual

This is a user manual for an example project.

Introduction

This project does something. We just haven't decided what that is yet.

Source Code

Java code from project

```
package example;

public class StringUtils {
    // tag::contains[]
    public boolean contains(String haystack, String needle) {
        return haystack.contains(needle);
    }
    // end::contains[]
}
```

This page was built by the following command:

```
$ ./gradlew asciidoctor
```
